

DELWYN LUU

Fresh/ Junior Business Analyst

☎ +61 449 576 618 ✉ delwynluu@gmail.com 🔗 [LinkedIn](#)

Summary

Fresh Business Analyst with 5 months of hands-on industry experience, seeking a junior BA or graduate role. I focus on understanding what stakeholders actually need — not just what they ask for — and translating that into clear requirements, structured documentation, and workable solutions. My technical grounding in data and systems means I can bridge business and development teams effectively, asking the right questions and keeping both sides aligned throughout delivery.

Experience

Cultural Infusion

Sep. 2025 – Apr. 2026

Data Analyst Intern

Melbourne, Australia

- Designed and implemented an **end-to-end ETL pipeline** using **AWS (S3, Glue, Athena)** to transform raw Zoho CRM data into an analytics-ready data catalogue, establishing a robust cloud-based analytics workflow.
- Automated weekly reporting by building a **live QuickSight dashboard** connected to Athena – replacing manual Excel reports with real-time, self-service insights for key stakeholders.
- Integrated **Zoho CRM APIs** to pipeline raw data, resolving authorisation, schema definition, and field-mapping challenges to ensure data integrity and reliability.
- Collaborated cross-functionally with technical mentors, developers, CRM administrators, and the AI Lead to troubleshoot complex data issues.

Technical Skills

- Business Analysis:** Requirements elicitation & documentation (BRDs, User Stories, Use Cases), business process modelling, workflow & swim lane diagrams, traceability documentation
- Programming & Querying:** Python (Prophet, Pandas), SQL, Node.js
- Data & BI Tools:** Power BI, AWS QuickSight, Excel (Pivot Tables, Power Query, Data Validation)
- Cloud & Data Engineering:** AWS (Glue, S3, Athena, Lambda), ETL Pipeline Design, API Integration, Data Cleaning
- Collaboration:** Jira, Microsoft Teams, Draw.io, Lucidchart
- AI Tools:** Claude (Anthropic), prompt engineering for analysis, documentation, and workflow automation
- Languages:** English (Advanced, IELTS 7.0), Vietnamese (Native), Chinese (Basic)

Projects

Trang Café Booking System | *Node.js, Express, Supabase, HTML/CSS*

2025 – Present

- Sole designer and developer of a full-stack café booking system for a planned venue in Ho Chi Minh City; applied a structured BA methodology across 6 phases — producing a BRD, Analytics & Reporting Spec, and 18 User Stories across 7 epics with GWT acceptance criteria.
- Built a RESTful backend API using Node.js and Express, integrated with Supabase (PostgreSQL) for data persistence and Resend for transactional email; implemented automated booking reminders via node-cron scheduler.
- Produced interactive HTML prototypes for the customer booking flow and staff operations dashboard to validate UX prior to development, supported by ERD, sequence, use case, and process flowchart diagrams.

Retail BI & Dashboard Development | *Power BI, Excel* | [GitHub](#)

- Delivered a BI solution for a global retail dataset; cleaned transactional data and designed interactive Power BI dashboards for regional sales and shipping performance.
- Identified underperforming regions and profit-driving cities, delivering targeted recommendations for cost optimisation and regional strategy improvements.

Market Feasibility Analysis – Saint Ann’s School | *ABS TableBuilder, Excel* | [GitHub](#)

- Co-led a six-person consulting-style engagement to evaluate campus expansion feasibility; scoped a target market of 2,500+ suburbs using demographic and socio-economic data, and delivered a data-backed entry strategy across three client presentations and a final report.

Education

Bachelor of Business Analytics – WAM 77

Mar. 2024 – Nov. 2025

Deakin University

Diploma of Commerce – WAM 80

Feb. 2023 – Feb. 2024

Deakin College
