Summary

Business Analytics graduate seeking a junior BA or graduate role, with 5 months of industry experience replacing a manual reporting process with an automated, self-service solution. I focus on what stakeholders actually need, not just what they ask for, and turn it into clear requirements, structured documentation and workable solutions. My data background lets me bridge business and technical teams and keep both aligned through delivery.

Projects

ArtInMelb – Art Gallery Visitor App | *Agile/Scrum, Jira, Miro*

Mar. 2025 – May 2025

- Scoped the core feature set for a mobile app promoting galleries, exhibitions and events at the Warrnambool Arts & Lost Trades Festival, setting direction for a 6-person Scrum team across **5 sprints** and **100 Jira user stories** (98 delivered).
- Owned the Arts module, translating user stories into **8 Miro prototype screens**: exhibition and artwork details, artist profiles, and filtering and sorting by style, medium and price, linked to ticket booking and the venue map.
- Adapted to a mid-project client change request: when the Events Committee required a unified look across all teams' apps, rebuilt my screens to the new shared design standard (font, colour palette, icons) within one sprint.
- Served as Scrum Master in the final sprint: ran 3 stand-ups and the retrospective, refined user stories against sponsor (Warrnambool Tourism Board) requirements, and tracked delivery of the final MVP with no end-of-sprint rush.

Sustainable Outdoor Co. – Digital Platform Analysis | *Case Study, SWOT, UML, BPMN*

Jul. 2024 – Sep. 2024

- Assessed a start-up's second-hand apparel platform through SWOT and a stakeholder analysis of **13 groups** (importance, influence, interests, assumptions and risks); recommended a go-to-market strategy from 4 options.
- Defined functional requirements for 4 user groups (buyers, donors, suppliers, management) with business justification; in a 4-person team, co-designed the use case diagram (**38 use cases** across 6 subsystems) and designed the domain class diagram (**15 classes**).
- Modelled the to-be process in BPMN across registration, donations and reward points, ordering, payment, inventory and feedback, and recommended prototyping and stakeholder workshops as elicitation techniques for an evolving Agile environment.

Trang Café Booking System | *Node.js, Express, Supabase, HTML/CSS*

Jul. 2026 – Aug. 2026

- Ran a 6-phase BA process for a planned café in Ho Chi Minh City, using AI tools to speed up drafting: a BRD, Analytics & Reporting Spec and **18 user stories** across 7 epics with GWT acceptance criteria.
- Directed an AI-assisted build of the working booking app (Node.js, Express, Supabase), validating the customer booking flow and staff dashboard with HTML prototypes, ERD, sequence, use case and process flow diagrams.

Technical Skills

- **Business Analysis:** Requirements elicitation & documentation (BRDs, User Stories, Use Cases), stakeholder & SWOT analysis, BPMN & UML modelling, swim lane diagrams, traceability, Agile/Scrum
- **Data & BI Tools:** Power BI, AWS QuickSight, Excel (Pivot Tables, Power Query, Data Validation)
- **Technical:** SQL, Python (Pandas), AWS (S3, Glue, Athena, Lambda), ETL & API integration, Node.js
- **Collaboration:** Jira, Miro, Microsoft Teams, Draw.io, Lucidchart
- **AI Tools:** Claude (Anthropic), prompt engineering for analysis, documentation, and workflow automation
- **Languages:** English (Advanced, IELTS 7.0), Vietnamese (Native), Chinese (Basic)

Experience

Cultural Infusion

Sep. 2025 – Apr. 2026

Data Analyst Intern

Melbourne, Australia

- Analysed the Education Team's fully manual weekly reporting process and delivered an automated replacement: a scheduled AWS pipeline feeding **10+ years** of Zoho CRM records (2015–2026) into self-service reporting on **\$7.6M+** in program revenue.
- Defined reporting business rules, consolidating 8+ operational CRM stages into 3 reporting groups (Won/Lost/Pipeline) and specifying revenue, profit and program metrics across **4 reusable SQL views**.
- Worked with the CRM administrator, developers, technical mentors and the AI Lead to resolve data access, schema and field-mapping issues, removing double-counted revenue across **257 delivered programs**.
- Designed a multi-page, filterable **QuickSight dashboard** (KPI cards, trends, stage and state breakdowns) giving stakeholders real-time visibility of revenue across 6 states.

Education

Bachelor of Business Analytics – WAM 77 | *Deakin University*

Mar. 2024 – Nov. 2025

Diploma of Commerce – WAM 80 | *Deakin College*

Feb. 2023 – Feb. 2024
